07/2019 - 12/2019

- Majorly worked on Reactjs projects and used React testing libraries for unit tests.
- Having a good hand on backend also we used Nodejs(Express) to build APIs.
- As a Database, we used Postgres Database and can handle MySql databases.
- Contributed software engineering expertise in the development of products through the software lifecycle, from requirements definition through successful deployment.

Education

ACS Diploma, Programming And Web Technologies

Institut Supérieur D'Informatique, Montreal, Quebec
01/2022

Bachelor of Information Technology

Birla Vishwakarma Mahavidhyalaya, Anand, Gujarat
06/2019

Academic Projects

Online Examination System : *(Technologies Used: Reactjs, Nodejs, Mysql)*

- The main purpose of developing this project was to create a dynamic atmosphere for conducting examinations and it was developed by four people and my main role was to develop frontend using react.
- We have used react js as frontend and node js as backend and we have used xampp as a database server. We have also used Agile technologies to develop our website and Github for version control and the intermediate to share code.

Library Management System : *(Technologies Used: PHP, Mysql)*

- Main Objective of our project was to create a dynamic atmosphere to track books of college i.e., who has taken the book and when is the return and issues date of the book the work was done under the faculty who guided with the working environment of the project.
- We have used HTML, CSS3 and Bootstrap for the frontend and our website was responsive too and our backend was designed with PHP and we have used mysql server.

Dating-site : *(Technologies Used: PHP, Mysql)*

- Purpose of this website was to create a dynamic atmosphere for the user to date online and to make new friends and it can also give the freedom to text the end user.
- Frontend was builded with the help of Bootstrap 4 and HTML and backend was designed with PHP and mysql database was used.

Many more project was done during academic studies like:

- **Android Application** : E-commerce application
- **C#** : Shopping Cart
- **Java** : E-Shop Website
- **JS** : Quiz-Web-Application
- **Reactjs-Nodejs** : Music Playlist
